Projects

Ai Text Detector
A system that analyzes and classifies text as human-written or AI-generated using NLP techniques, with linguistic pattern analysis and confidence scoring to provide accurate, real-time results.

Campus Connect
A platform that connects students with the same mindset to start startups or build projects together. Solves the problem of finding co-founders and like-minded collaborators within a campus community.

Spotify Clone
Developed a responsive **Spotify Clone** with a modern UI, featuring music browsing, search, playlists, and audio playback controls. Built using **HTML, CSS, and JavaScript**, delivering a smooth and interactive user experience.
